Capabilities

Warehousing

BigQuery	5+ YRS
ELT Frameworks	5+ YRS
Jupyter	5+ YRS
Pandas	5+ YRS
Python	5+ YRS

Deployment

CI/CD Systems	5+ YRS
Cloud Services	5+ YRS
Docker	5+ YRS
Infrastructure as Code	5+ YRS
Serverless Platforms	5+ YRS

Insights

Audience Pipelines	5+ YRS
CDP Modeling	5+ YRS
Data Visualization	5+ YRS
Excel	5+ YRS
LLM Ops	5+ YRS

Experience

Product Engineer

AdventHealth • Orlando, Florida

- Build an internal replacement for Collibra, developing backend services in Go.
- Deploy and manage application workloads on Kubernetes.
- Connect services through Azure Service Bus queues for asynchronous processing.

Present

Business Analyst II

AdventHealth • Orlando, Florida

- Partnered with clinical and operations teams to define data requirements for performance and quality improvement initiatives.
- Designed SQL-based reporting pipelines and Power BI dashboards for inpatient care and readmissions metrics.
- Supported data validation and reconciliation efforts across Epic Clarity and EDW environments.
- Contributed to cross-functional analytic projects focused on cost reduction, patient outcomes, and digital health integration.

Jan 2025

Aug 2025

Analytics Engineer

Penske Media Corporation • Los Angeles, California

- Led evaluation of six AI and data vendors, assessing integration, latency, and scalability to guide $5M in platform investment decisions.
- Fine-tuned large language models using Python, improving generative quality by 10% based on editorial scoring loops.
- Built twelve Python- and SQL-based reporting pipelines in GCP, integrating with Looker to deliver topic insights across thirty media brands.
- Increased subscription conversion rates by 5% through KPI reporting in GCP that powered targeted marketing runs.
- Modeled first-party user behavior in Treasure Data CDP using 150+ signals to support retention and exec briefings across Rolling Stone, Billboard, and more.

Apr 2022

Apr 2024

Founder, Data Automation

BTJN • Houston, Texas

- Implemented two customer data platforms to improve audience segmentation and campaign targeting for 2M+ high-value prospects.
- Migrated three legacy systems to GCP, doubling data processing speeds and streamlining analytics workflows.
- Automated email marketing pipelines that converted 10% of 5,000 cold leads into qualified clients.

Jan 2020

Apr 2022

Research Assistant

University of Central Florida • Orlando, Florida

- Designed a rubric for coding international human rights violations using statutes from major global treaties.
- Led a five-person research team to develop an open-source MySQL database documenting systemic abuses across global conflict zones.
- Co-authored an analysis on gender-based violence published by De Gruyter and presented at the International Criminal Court in The Hague.
